

Sun, Stars and Planets

The planets in our solar system are named after Roman gods and goddesses. Have a look around the **Hadrian's Wall gallery** and see how many you can find (not all the planet-gods are there, but we've found at least 5!). Read the labels around the gallery for help....

See if you can find
Mithras and
the signs of
the Zodiac
too!

Mercury

Venus

Earth

Mars

Jupiter

Saturn

Uranus

Neptune

Some ancient Egyptian gods were shown with the disc of the sun (our own star!) on their heads. Look around the **Ancient Egypt gallery** and see if you can find some of them. We spotted Hathor, Isis, Horus and an Apis Bull—who can you find?

Did you know that one of our mummies is called Bakt en Hor, which means Servant of Horus? Look at her sarcophagus.

In the **Crystals and Gems gallery**, you can find some real rocks from space—find out where one fell in north east England!
