'FIRST I THINK, THEN I DRAW MY THINK'

ANON CHILD

Drawings by children often become a concrete realization of what the subject matter they are drawing feels like, as a **'whole sensory experience'**. A drawing of a pond might show how it is possible to walk around the shape of the pond, how fish sit underneath the water, with a blue sky and sun above and grass underneath.

Think about drawing as a sensory experience.....

HEIKE LISS

Exhilarating.
Exhausting.
A physical and
emotional
release.
I stretch, bend
and kneel to
reach the edge
of the paper.
The pace is fast.
The music is
loud.
Dancing with a
pen in my hand.

The video content shows a hand-drawn grid on a whiteboard. The grid is divided into three horizontal sections. The middle section contains the word 'tuneTrace' written in a stylized, blocky font. The letters are composed of small squares, and some of the squares are highlighted with blue dots. The top and bottom sections are empty grids. The video player interface includes a play button, a volume icon, a progress bar, a settings gear, and a full-screen icon.
